Election/Restrictions

1. Applicant's election of specie D in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 112

1. Claims 5 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, lines 2 and 3, and claim 18, line 3, there is a lack of antecedent basis for "said stop member". This renders the claim confusing as it indicates that the structure has been previously recited. Further, as the stop portion has been set forth, it is unclear what the stop member is.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Rutter.

Rutter shows a closure body 32 having ends; opening 44; fitment 28; fluid source 30; closure valve 34 having ends; opening 58; handle 38; the valve is removable as

discussed in column 4 line 50 through column 5, line 37 and would clearly be capable of allowing inline filling once the bag was pierced; flange 28 that is integral with the fluid source (i.e. in one piece); body portion/stop member 46, 50; stop portion 54; and seal 56 that covers the closure opening.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rutter in view of Christine et al.

Rutter has been discussed above, but lacks the flange being welded to the container. Rutter does teach adhering the flange to the container by cementing (i.e. an adhesive) or "otherwise firmly" attaching as discussed in column 3, lines 30-35.

Art Unit: 3754

Christine et al. teaches the equivalence of adhesives and ultrasonic welding in column 3, lines 2-6. It would have been obvious to weld the flange to the container as taught by Christine et al. on the device of Rutter as Rutter teaches the use of adhesives or other means of attaching and Christine et al. shows that welding is an equivalent to adhesives.

Allowable Subject Matter

7. Claims 7-17 and 19-29 are allowed.

The prior art does not show the details of the locking members, especially in relation to the handle or coupler.

8. Claim 18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Connan, Lee, and van Leer show other locking devices; and Maggenti and Rutter et al. show other rotary devices for dispensing fluid.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph A. Kaufman whose telephone number is (703) 308-0266. The examiner can normally be reached on Monday-Friday (second Mondays off), 5:30AM-3PM.
